EDUCATION

Sep 2023 — Present	Bsc in Computer Science, Taylor's University	KL
Sep 2022 — Aug 2023	Foundation in Computer Science, Taylor's College	KL

EMPLOYMENT HISTORY

Jan 2026 - Present	President, Taylor's Sri Lankan Society	KL
	- Lead and coordinate society activities, cultural events, and collaborations within the university community. - Manage executive committee operations including event planning, budgeting, and member engagement. - Represent the Sri Lankan student community in university meetings and external collaborations. - Organize social, cultural, and networking events to strengthen student involvement and inclusivity. - Oversee marketing, sponsorship outreach, and communication strategies for society initiatives.	
Sep 2018 - Present	Operations Manager, Matale Bake House (Hybrid)	KL-Matale
	- Managed digital bookkeeping records, sales tracking, and expense documentation for daily bakery operations. - Maintained and organized operational data using spreadsheets and online management tools. - Assisted with inventory monitoring, order tracking, and supplier coordination through digital systems.	
Jun 2018 – Sep 2018	Media Intern, Matale Bake House	Matale
	- Assisted in managing the bakery's social media platforms to improve online presence and customer engagement. - Created promotional content including posts, stories, and visuals for marketing campaigns and seasonal products. - Supported digital advertising and promotional activities to increase brand awareness and customer reach. - Monitored audience interaction and contributed ideas to improve social media engagement and visibility.	

EXTRA-CURRICULARS & Achievements

- Achieved first place at multiple Oratorical and Poetry Contests, Sri Lankan International School, Riyadh (2014-2019)
- Football Team Captain, Sri Lankan International School, Riyadh (2017-2018)
- Senior Prefect, Sri Lankan International School Riyadh (2018-2022)
- Achieved first place at multiple Oratorical and Poetry Contests, Sri Lankan International School, Riyadh (2014-2019)
- Member of the debating team that won at the Interschool Championships, Sri Lankan School Riyadh (2018)
- Awarded a Degree Scholarship after achieving Dean's List recognition for outstanding academic performance during Foundation studies, Taylor's College, Kuala Lumpur (2023)

Skills & Interests

- **Languages:** English (Native), Tamil (Native), Arabic (Proficient).
 - **Technology:** Python, R/RStudio, SQL, Java, JavaFX, Jupyter Notebook, Google Colab, pandas, NumPy, scikit-learn, TensorFlow/Keras, Matplotlib, Seaborn, Hadoop, HDFS, Hive, Spark SQL, MapReduce, Git/GitHub, Microsoft Office Suite, and Canva.
 - **Sports:** Active participant in basketball, football, badminton, and tennis with multiple championships won in inter-school competition
-

RESEARCH PROJECTS

CNN-Based Potato Leaf Disease Classification | Python, CNN, Computer Vision, Deep Learning. (Jan-May 2023)

- Developed a CNN model to classify potato leaf images into Healthy, Early Blight, and Late Blight categories using a labelled Kaggle image dataset.
- Applied image preprocessing, normalisation, data augmentation, class weighting, dropout, EarlyStopping, and ReduceLROnPlateau to improve model generalisation.
- Evaluated model performance using accuracy, precision, recall, F1-score and confusion matrix analysis, achieving strong test performance while identifying class imbalance limitations.

Drug Overdose Data Mining and Predictive Analytics | Python, Machine Learning, Data Mining (Jan-May 2022)

- Conducted a full data mining analysis on accidental drug-related deaths data, applying classification, regression, clustering, and anomaly detection techniques.
- Compared Random Forest, SVM, Linear Regression, Polynomial Regression, K-Means, DBSCAN, Isolation Forest, and LOF across different analytical objectives.
- Performed preprocessing, feature engineering, model validation, ROC/AUC analysis, visualisation, and interpretation to identify opioid involvement, geographic hotspots, substance trends, and anomalous cases.

Smart Energy Big Data Analytics | Hadoop, HDFS, Hive, Spark SQL, MapReduce

- Analysed a 14-year hourly energy consumption dataset to explore smart energy management, peak-load patterns, and large-scale batch analytics.
- Designed a scalable big-data workflow using HDFS, Hive, Spark SQL, and Hadoop MapReduce for distributed storage, SQL-style querying, and batch processing.
- Compared tool performance and produced insights to support energy demand analysis, anomaly detection, operational decision-making, and sustainability planning.

Student Academic Performance Statistical Modelling | Python/R, Regression, Statistical Testing

- Analysed a student performance dataset to identify how study habits, motivation, sleep, parental involvement, internet access, and technology use affect exam outcomes.
- Applied Pearson correlation, t-tests, ANOVA, data visualisation, and multiple linear regression to test relationships between academic factors and performance.
- Evaluated model reliability using R^2 , Adjusted R^2 , RMSE, and regression diagnostics, producing data-driven
